

# non slip tile

## Description

Non-slip treatment for tiled floors.

## Instructions for use

The surface must be clean and dry before treatment. Apply on the surface to treat using a roller or fine and uniform spray, and allow it to work for 10 minutes. The exposure time of the liquid must be the same throughout the entire surface to treat. These times are approximate; we recommend you perform a previous test to optimize the desired effect. After this time, rinse with plenty of water. The treated surface may undergo changes of hue and/or gloss, and might be more difficult to clean. Perform a preliminary test before applying on the entire surface. The degree of non-slipage achieved will depend on the surface of the ceramic tile.

## Coverage

- 200 gr/m<sup>2</sup>

## Warning

Harmful if swallowed. Harmful in contact with skin. Causes skin irritation. Causes serious eye irritation. Harmful if inhaled. Avoid breathing spray or vapors. Wear protective gloves / protective clothing / eye protection / face protection. If on skin: Wash with plenty of soap and water. If inhaled: Take the victim outside and keep at rest in a position comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If skin irritation occurs: Get medical advice/attention.

## Aplicaciones recomendadas

- Glazed and non-glazed ceramic floor tile coverings.
- Indoor and outdoor floor tile coverings.
- Built in shower trays.
- Do not apply on fibre shower trays and bathtubs.
- Do not apply on materials which are sensible to acid attack, like limestones or mortar substrates.
